Let harmony enter your rooms!

Color Additive for decorative paints

is a mastic resin-based additive for all types of decorative finishes, whether emulsion, acrylic, or oil paints.

It has a harmonising effect on the entire atmosphere of rooms and sensitive people experience an immediate positive response to it: they find it both pleasantly appealing and relaxing and are open to inspiration too. Children become and remain more tranquil, and pets as well, like to remain in rooms whose walls and ceilings have been enriched with the colour additive.

The product is absolutely harmless and kind to the skin.

Especially worth knowing

- bio-activated absolute of mastic resin
- mastic resin dissolved in various vegetable oils

Use

The colour additive is added to the paint undiluted:

- Add 25 ml color additive (Farbzusatz) to 5 kg paint
or 30 ml color additive (Farbzusatz) to 1 gallon (6 kg)

Ingredients

PEG-7 glyceryl cocoate, pistacia lentiscus, PEG-6 caprillic/capric glycerides, methylparaben

Retail packs
